Since its founding in 2015, Bee has rapidly built a major network of electric car charging points throughout Sweden—all from a small team based in Helsingborg. To keep up with its fast growth, the Bee team turned to Microsoft 365 for a simpler, more secure way to collaborate and communicate. Now the company is prepared to continue expanding, meet new opportunities, and ensure its data is safeguarded from a wide array of threats.

“Microsoft 365 gives us the tools and mental space to come up with new and creative ideas on how to make a difference in the lives of electrical vehicle owners.”

“Everybody knows how to use Microsoft 365. Everybody gets it—and that’s freeing time for innovation. They’re using the products in more and more advanced ways.”

— Martin Karlsson, Chief Digital Officer, Bee AB
