

2,500 miles from the mainland, diving company connects employees across sea and land with cloud services

Jack's Diving Locker (JDL) distinguishes itself from the roughly 40 other dive outfits on Hawaii with personalized service, environmentalism, and knowledge of local marine life. JDL migrated to Microsoft 365 Business to streamline the process for stocking boats with gear and to keep employees connected as they explore the ocean, repair equipment, and teach students. Employees are more productive and mobile as they use Office 365 to access company resources, collaborate on shared daily tasks, and communicate as teams.
