

Sydney-based Presentation Studio helps some of the biggest companies in Asia Pacific deliver more memorable presentations. To help its fast-growing creative staff across the region collaborate more effectively, the company upgraded to Microsoft 365. With a rich suite of virtual productivity tools, Presentation Studio can let employees work from anywhere, which helps it attract talent and expand faster. Also, by using Microsoft 365, the company has halved its IT costs and enhanced security for customer files.

“Things move faster with Microsoft 365. Internal communications and processes are significantly faster, we’ve reduced the noise and distraction of email clutter, and people are happier.”

“We sign massive NDAs for banks and corporations that guarantee the confidentiality of their information. Being behind Microsoft walls gives us far stronger security.”

— **Emma Bannister, Chief Executive Officer, Presentation Studio**
